

NEW PRODUCTS FROM SPEEDPLAY

FULLY INTEGRATED AND TRULY WALKABLE™. ANOTHER SPEEDPLAY FIRST.

Speedplay's new Walkable™ Cleat technology for Zero and Ultra Light Action pedals sets a new standard for user-friendly, off-the-bike functionality. Speedplay's Zero Aero Walkable™ Cleats and Ultra Light Action Walkable™ Cleats are the first truly Walkable™ cleats for road pedals. The integrated, rubberized cover stays on the cleats permanently to improve traction on all surfaces and protects the cleats from wear when walking. Additionally, the thin, contoured cleat profile allows for a more natural gait and makes walking in road shoes much less awkward.

In addition to these benefits, the cleats also provide protection from contamination with their innovative new accessory called Cleat Buddies. Cleat Buddies are handy plugs included with the cleats for use when walking in dirty conditions. Cleat Buddies prevent debris contamination by fitting into the cleat's center cavity. When you are ready to ride, Cleat Buddies can be easily removed for riding and conveniently snap together to fit in a pocket or bag.

The Zero Aero Walkable™ Cleat's fully streamlined cleat profile includes the added feature of a dimpled surface to further improve the aerodynamics of the Zero Pedal System.

Ultra Light Action Walkable™ Cleats, with its redesigned spring that makes entry 50% easier than the original, make the Light Action Pedal System, hands down, the most user-friendly clipless pedals available.

- Zero Aero Walkable™ Cleats are streamlined and dimpled to reduce drag and are compatible with all models of Zero Pedal Systems
- Ultra Light Action Walkable™ Cleats are compatible with all Ultra Light Action and Light Action Pedal Systems
- Grippy, rubberized tread covers the cleat for improved traction
- Durable cover material is resistant to wear and will not scuff floors
- Thin, contoured cleat profile makes walking easier and more fluid
- Fits all standard 3-Hole and 4-Hole shoes
- Walkable™ Cleat Covers and Cleat Buddies are available separately

NEW PRODUCTS FROM SPEEDPLAY

THE MOST AERODYNAMIC PEDAL SYSTEM. PERIOD.

As its name suggests, Speedplay's Zero Aero Pedal System is designed to increase speed by slashing wind resistance. With a tiny frontal area, a dimpled surface, and a streamlined profile, the Zero Aero is the ultimate aerodynamic pedal system. Every aspect of its design has been painstakingly tailored to boost speed by minimizing wind drag. Developed specifically for Time Trials and Triathlons where every second counts, the Zero Aero Pedal System provides more speed with the same power – that is why we call it free speed!

Includes Zero Aero Walkable™ Cleats with special Aero Base Plate Surrounds.
